

## WINDOW TINTING

The manufacturer warrants Beam Window Tinting against bubbling, cracking, peeling, scratch resistant (SR) coating breakdown, delamination from glass and demetallising from the date of the original purchase for the Lifetime of the Vehicle when properly installed on the interior surfaces of glass by a duly authorised installer. If the film fails to comply with this warranty, the manufacturer or its distributor will replace such quantity of film as proved defective (including labour). No liability is assumed for scratching or other damage to the film caused by improper treatment or from glass breakage from any cause or any consequential damage. This warranty is void if the film is subject to abuse or improper care in particular the warranty shall not apply if the film has been subjected to mistreatment such as picking at edges, cleaning with abrasive or ammonia based products.

This warranty is not transferable.

### CARE FOR YOUR TINTED GLASS

- Don't open windows for 48 hours after installation
- Don't clean glass during drying period, (21 days)
- To clean, spray film with soapy water and wipe off lightly with soft cloth. Don't use abrasive cloths, brushes, powders or ammonia based cleaning materials.
- An almost invisible splice may appear on windows which require two or more sections of film. This is not a fault in the film.
- The barely visible clear border around the edges ensures that the film is properly bonded to the glass.
- A milky appearance caused by water between film and glass will disappear along with any bubbles.
- A few small "points" may remain. These are generally visible from the outside and inherent to film adhesives. These points do not affect the performance of the film.
- The silver effect caused when film is applied over the ceramic "black dots" that surround some glass is normal and not a fault of either film or application. The performance of the film is not affected.

## SURFACE PROTECTION PRODUCTS ANTI-RUST - PAINT - FABRIC - VINYL - LEATHER

### GENERAL CONDITIONS

All Beam surface protection products are warranted for a period of 10 years from the date of vehicle manufacture as shown on the vehicle compliance plate subject to certification that they have been correctly applied by an authorised Beam Applicator in accordance with Beam procedure. No warranty is available for vehicles over 5 years old. This warranty is particular to the owner and vehicle described herein for the term and subject to the conditions herein. The warranty does not apply unless the consumer agrees that he or she has read the warranty, fully understands it and accepts the entire context thereof. (Warranty valid only if signed).

This warranty is void:

- At the expiration of the term of the warranty shown herein.
- If the treated vehicle is not inspected and re-treated by authorised Beam Applicator within 30 days of the annual anniversary of the treatment and thereafter every year. (Excluding Window Tint)
- If the treated vehicle is subjected to unreasonable owner abuse or neglect or for any other reason listed herein.
- If the vehicle leaves mainland Australia for any reason whatsoever.

- If the vehicle is modified from the manufacturers original specifications in anyway.
- If any unauthorised work occurs to the treated areas.
- If accidental contact with chemicals or collision damage has occurred and the damaged areas have not been professionally repaired and the damaged areas are not retreated by an authorised Beam Applicator within one month of repair work.
- If the vehicle (of any type) is used for special purposes in extreme conditions, for example but not limited to - beach lifeguard, Mining and Construction, Carriage of hazardous or corrosive materials or chemicals, professional fishing, subjected wholly to salt water or beach use more than 12 times annually.

### RUST PROTECTION (Chemical Spray Treatments)

Beam warrants that should the treated vehicle corrode below window level from an internal metallised surface to the external surface capable of being treated. Beam shall repair or replace (at its discretion) the damaged area at no cost to the owner to a maximum cost of \$1000 on any one claim and subject to the conditions below.

- This Warranty does not cover:-
- Rust arising from chipping or flaking paint, between pressed metal seams or wherever body mouldings come in contact with the metallised body panels (including rubberised window mouldings).
- Rusting of chrome plated trims, engine, drive train, exhaust, electrical, brake, suspension, heating or cooling systems and all fittings and fastenings associated with above as these areas cannot or should not be chemically rust proofed.
- Rust caused by Battery acid or inside vehicle load areas (i.e. utility).
- Rust due to defective workmanship and materials in the manufacturer of the vehicle, areas affected by collision damage, fire, salt water immersion or sole beach use.

### ELECTRONIC RUST PROTECTION (ERS)

Beam warrants that should the protected vehicle corrode from an internal metallised surface out, Beam shall repair or replace (at its discretion) the damaged area at no cost to the owner subject to a maximum cost of \$1000 on any one claim and conditions below.

- This Warranty does not cover:-
- Rust arising from chipping or flaking paint or wherever body mouldings come in contact with the metallised body panels (including rubberised window mouldings).
- Rusting of chrome plated trims, engine, drive train, exhaust, electrical, brake, suspension, heating or cooling systems and all fittings and fastenings associated with above.
- Rust caused by Battery acid or inside vehicle load areas (ie utility).
- Rust due to defective workmanship and materials in the manufacturer of the vehicle, areas affected by collision damage, fire, salt water immersion or sole beach use.
- It should be noted that the brown stain (ferric oxide) that develops on and around paint chips is not rust as such and should be cleaned and repainted at the consumer's earliest convenience.

### PAINT PROTECTION

Beam Paint Protection Treatments are warranted to help prevent deterioration or loss of gloss to the treated areas as a result of exposure to normal weather conditions and eliminate the need to wax or polish the treated areas for the term of the warranty. If the product fails to comply with this warranty, Beam will clean or buff (at its discretion) the external painted surfaces where it can be shown to have failed including

re- application of the protection treatment. Provided that:

- No accidental damage, stone chipping, contact with chemicals or bore water, harsh detergent or salt brine areas, damage from car wash brushes, vandalism, scratches has occurred.
- The vehicle is reasonably maintained including regular washing and removal within 24 hours of all tree sap and bird droppings etc.

### FABRIC • VINYL • LEATHER PROTECTION

Beam warrants that should the treated areas become permanently stained or soiled, Beam will clean or replace (at its discretion) the affected area.

- This Warranty does not cover:-
- Stains, soiling or damage caused by acid, dye, ink, bleach's, solvent, gum, paint, burns, tears, rips, cracking vandalism or neglect.

### ANNUAL WARRANTY SERVICE

It is a condition of this warranty that all treatments (excluding Window Tinting) undergo an annual inspection and re-treatment Service by authorised Beam Applicator. A fee will be charged for each service

## ANNUAL SERVICE PROCEDURE

To ensure your Beam products continue to work for you year after year the following seven point inspection plan forms part of our quality programme.

### ON THE HOIST

1. Inspect entire underbody with light beam and inspection probes and re/insstate Rust Protection as required. If vehicle requires pressure cleaning, a cost may be incurred.
2. Inspect and if required, spray areas behind headlights and front grille trims.
3. Check operation of Electronic Rustproofing Systems & couplers.
4. Re-treat wheel arches annually to compensate for any stone chip damage.

### ON THE FLOOR

5. Inspect all seams and joints outside car and in boot and engine compartments.
6. Remove door trims and inspect with light beam and re-treat as required.
7. Inspect Fabric and Paint Protection as required. Note on card and advise customer if paintwork is damaged or flaking or if Fabric Protection requires re-application. Re-Apply Paint protection annually.

### PROCEDURE FOR TRANSFER OF WARRANTY

Your Beam Warranty is transferable on the condition that an inspection by an authorised Beam Service Centre occurs within 30 days of the change of ownership. That inspection must be in addition to any scheduled inspections required under your warranty and will be charged for at the normal inspection rate current of the time of inspection.

### WARRANTY CLAIM PROCEDURE

If a manufacturer's or any other warranty was in effect on the vehicle at the time this warranty was issued, the claimant shall first look to the pre-existing warranty. If no other such warranty exists and any of the Beam products have failed to protect the vehicle as described, the owner must return the vehicle along with the current warranty booklet to an authorised Beam Service centre within 21 days of discovering the fault. All repair claims must be approved by Beam and will only be repaired once, any repairs will be carried out by licensed tradesmen but Beam will not be responsible for exact paint colour matching although every effort will be made to colour match the repair.
