-  **10yr Nationwide Warranty**

# WHY CAT?

## CAT provides a system, not just a gadget!

Not all electronic rust suppression systems are the same!

A negative electrolysis system like CAT is the ONLY method effective on 'free air structures' like motor vehicles and machinery. You can be assured that everything associated with CAT is quality and with a CAT unit protecting your asset there is nothing in the world that could be doing a better job.

CAT are the leaders in electronic rust prevention with over 25 years of experience built around research, testing and tens of thousands of satisfied customers.

✓ **HOW TO PROTECT YOUR INVESTMENT!**

✓ **THE BEST PROTECTION FROM RUST - GUARANTEED** ✓

### FEATURES & BENEFITS

- > CAT can slow the spread of new and existing rust by up to 5 times (from test results).
- > CAT can help prevent electrolysis caused by dissimilar metals.
- > CAT can reduce maintenance costs and prolong the life of the vehicle.
- > CAT is both 12VDC and 24VDC compatible.
- > CAT uses "Smart Input Control" (SIC) to increase output power by 4x when the vehicle is running.
- > CAT uses less than 35 milliamps when your vehicle is not running, so it will not send your battery flat.
- > CAT is 100% Australian technology and is designed Aussie-tough for the harshest conditions.
- > CAT will not in any way interfere with automotive electronics.
- > CAT can maintain the resale value of your vehicle by keeping it rust free.
- > CAT can be transferred to your next vehicle.
- > CAT protects the entire vehicle, not just areas which can be sprayed.
- > CAT has even been shown to slow paint oxidation (anecdotal evidence from CAT owners).

**TRIED, TESTED, PROVEN, GUARANTEED**

GUARANTEE  
T&C's apply

"I have had one of these systems installed in my last seven cars. When I came to trade to them in they were absolutely pristine, inside and under body. My new motorhome which is presently under construction deserves one too. Great Product, anyone not using one have no idea what they are missing. Keep on keeping on."

(2015 - Jack - Sunshine Coast QLD)

"My Toyota Landcruiser has been fitted with a CAT protection system since being purchased new in 1992. The paint work is still original and in very good condition due to the fact that The CAT has done it's job over a 20 year period."

(2012 - Allen - Western Australia)
